

# THE GLEICHEN CALL

VOLUME XXVIII NO. 7

GLEICHEN, ALBERTA, WEDNESDAY

MAY 1, 1935

SUBSCRIPTION \$2.00 PER YEAR

## BLACKFOOT M. D. COUNCILLORS IN REGULAR SESSION

The councillors of the Blackfoot Municipality held a regular session beginning late in the afternoon with the following members present: Deputy Reeve Umbricht, Councillors Bolinger, Deschamps, Nelson Wheatley and Reeve Thorson who was delayed in arriving.

The council decided to recommend to the Field Crop Commissioner that all stubble and especially stubble to be summer-fallowed be plowed before and during the grasshopper hatching season. When all vegetation is killed the young grasshoppers hatch die from lack of food. It was decided that all payments as ckd by the finance committee be paid.

The new provincial act introduced to deal with soil drifting was next discussed. The opinion of the council was that while the act had its merits its introduction was too abrupt. Councillor Nelson had the following resolution carried: That we do record as our opinion in favor of the bill introduced by the Alberta Legislature regarding soil drifting and covering act being tabled for one year; at least to allow for more education and investigation. The council then adjourned for refreshments and reconvened at 7:30 p.m.

This following schedule of wages is to be paid for work done otherwise than by contract: foremen 35c an hour; laborers 27½c per hour; each horse 7½c per hour; dragging, 4 hours; drag 30c per mile; dragging, 6 horse drag 40c per mile.

W. E. Thompson was appointed assessor. Mr. Bolinger was appointed to represent the district and to cooperate with the various Gleichen committees in arranging and helping the Silver Jubilee celebration. The Municipality had been asked to cooperate in this. The seed grain by law, No. 25 was given its third reading and was ordered signed and sealed. There was an amendment to the by-law motion of the council to add "etc." That by-law No. 25 be amended by striking out the sum of \$6,000 where it appears in said by-law and submitting the sum of \$6,000, this also was read a third and passed unanimously.

Councillor Wheatley: Whereas the Department of Public Works of the provinces of Alberta are now planning their works program for this year, and whereas this council has gone on record as favoring the classification of the twelve miles of road running east from where the No. 2 Highway turns south to Gleichen at the north east corner of section 12. And whereas we have in the past stated that we would consider co-operation. Therefore be it resolved that in order to help the Department of Public Works decide their program of secondary highways that we go on record as being ready and willing to assume our share of the cost of the work on the twelve miles of road in our municipality commencing at the north east corner of Section 12 and continuing easterly to the limits of the municipality and that we further request that this road together with the road easterly to Hussar be classified as a secondary highway.—Carried.

Councillor Umbricht reported that he had unloaded and hauled bridge material to renew the bridge west of section one in township 23. The meeting then adjourned.

Sometime during this week the laying of the second course of gravel on Highway No. 2, between Strathmore and Cluny, will commence. In this connection several Gleichen men have been fortunate in securing work. Albert Robinson and Son are supplying a steam tractor with which to run the machinery to crush gravel at Crowfoot Creek. They spent a couple of days last week taking the engine to the scene of operations and getting all set to run. Once gravel crushing commences they will work on two eight hour shifts and expect to keep going until sometime in July. Fred Jones will level off the gravel after the trucks have dumped it. He will begin at the Strathmore end and move east. Fred will supply the necessary horses to do the work. Clydes House will do likewise beginning at Cluny.

## SILVER JUBILEE WILL BE MEMORABLE DAY HERE

Next Monday, May 6th, Gleichen in common with the rest of the Empire will celebrate the Silver Jubilee of His Majesty, King George, ascension to the throne in a fitting ceremony that will take place at the fair grounds. In connection with this celebration it particularly requested that all citizens decorate their property as much as possible, in order to give a gala appearance to the town. It is understood that many people have flags and bunting used on former occasions, which could be taken from dusty compartments and put to use. Let us all pull together and put this celebration over in grand style with decorated streets, a colorful parade with trimmed up autos and cycles.

All preparations have been completed to in particular ensure the children a happy day of celebration. At one o'clock in the afternoon the paraders are to meet at the auto camp, just west of the Bank of Commerce and from there will form a parade which will proceed to the fair grounds where fitting ceremonies will take place.

The plan of the parade as outlined

by Col. A. G. B. Lewis is as follows:

Royal Canadian Mounted Police

23rd Field Battery, C.A.

Canadian Legion B.E.S.L.

Invited guests in cars.

Mayor and Council, Town of Gleichen in cars.

Gleichen School Boy's Band.

Mental Blackfoot Indians.

Councillors and Municipalouncillors in cars.

Boy Scouts

Club Packs

Rover Patrol

Girl Guides

Brownies

School Children.

This parade is to assemble at the Gleichen motor car camp at 1 o'clock sharp and will be ready to move a nine thirty.

Arriving at the fair grounds the parents and spectators will be formed in the shape of the letter U. At the open end will be a platform and saluting base and on each side of the base school children will stand. Along the inside of the circle and in front of the saluting base will be lined up the Girl guides and Brownies and on the other side the Boy Scouts and Cubs. At the far end will stand the mounted Indians, about half the time the Canadian Guards in 22nd Battery, then the Mounted Police. In the centre of the area will be located the town band.

The ceremonies at the fair grounds will commence at 2 o'clock.

The 22nd Battery will fire a "Feu de Joie," or Royal salute which will consist of a continued round shooting, starting from right to left in the present round, then reverse, then left to right in the rear. There will be 24 volleys in this. The Battery, British Empire Service League, the Boy Scout and Girl Guide will then march past the stand, after which the Scouts and Cubs will form a semi-circle where their own particular ceremonies will be carried out.

School children from many of the nearby schools will be present and will be presented with a commemorative medal in honor of the day. This will include all children up to and including grade eight from both the country and Gleichen schools. Children's sports will then be provided for which a fine array of prizes will be given the winners. All children of Scout and Girl Guide age or under will participate.

Scoutmaster Rev. House stated that the entire scout organization of the Bow Valley District will be on hand on Monday and it was their intention to stage a jamboree.

Some 500 or more children will be present as a committee consisting of Messrs. House, Michael and W. W. Brown have completed arrangements to feed them. While a complete meal has not been provided for them will be plenty of sandwiches and some hot drinks such as coffee or cocoa.

It is hoped that the weatherman will see his way to send an ideal day in order to make the whole thing a

succes it deserves.

In the evening a big dance will be staged in the Gleichen Community Hall, being sponsored by the Gleichen Hockey Club. The hockey boys are out to make a success of the dance and promise all a good time. The general public are invited to attend. The Prairie Ramblers Orchestra which is well known here, will supply the music.

### DASHES FROM CRAIGANTLER AND DISTRICT

Carl Collins is sporting a new Maple Leaf truck with a radio installed. Carl has a contract to haul gas into Saskatchewan.

Miss Jessie Grant was home for a few days visiting her parents.

A number of people from the Yule district with some Craigantler folks met at the home of O. Charrand and said "hello" to the newly weds. Cards were indulged in while others enjoyed themselves dancing. The music for the dances was supplied by H. Dankerth. Owing to the bad condition of the roads there were quite a number of people who were unable to get there. However, everyone had a fine time.

The weather for this time of the year is backward. Feed is getting very low with many of the farmers. Some of the cattle and horses are getting thin.

Mr. and Mrs. George Yule and Mr. and Mrs. Bert Stott entertained the crowd at Ole Charrand's party with that fine old song "We shall never let the old flag fall" and the encore was "God Bless the Prince of Wales."

George Collins and Henry Dancker were boasting of their ability to shoot moose, when Verne Green came along and told them that moose was very cheap to buy last season.

The following taken in part from the Forest, Ontario, Free Press gives details of the funeral of Miss A. Kent, who died in Gleichen two weeks ago. "The funeral service at Forest was held from the home of her brother, Fred Kent, and was largely attended by friends. During the service Mr. F. Flater sang two solos. Among the many floral tributes were wreaths from the staff of Gleichen school, sprays from the Primary Room, Gleichen, from the Evans family and a Star from the O.E.S. Chapter 18 Gleichen. Her unusually popular funeral, and loyalty to her friends endeared her to everyone so that her loss is deeply regretted. Of her a former inscription in a telegram states: 'She was one of God's noble women who gave the world the best she had. She will be greatly missed by all who knew her especially the children who came under her kindly care.'

It is hoped that the weatherman

will see his way to send an ideal day

in order to make the whole thing a

### GRADUATES OF OLD SUN SCHOOL HAVE REUNION BANQUET

A reunion and banquet of the graduates of Old Sun School took place on Wednesday evening of last week, with some 200 graduates attending. The banquet was held at Old Sun School, on the Blackfoot Reserve. Among the visitors in attendance were: Dr. Westgate of Winnipeg; Dean and Mrs. Haig of the Cathedral Calgary; Col. A. G. B. Lewis and Mrs. Lewis, Indian Agent G. H. Gooderham and Mrs. Gooderham.

Rev. J. W. House acted as chairman and proposed the toast to the King. Bishop Childs presided at the Church, which was responded to by Dr. Westgate and Dean Haig. The Department of Indian Affairs was proposed by Teddy Yellow Fly and responded to by Mr. Gooderham and Col. Lewis. The visitors toast was proposed by Jim Keog, George Crane Bear and Dick Bad Boy and was responded to by Chief Little Poplar of Hobema Reserve.

After the speeches a social evening was enjoyed and a few Indian dances were put on. At 10 o'clock Dr. Westgate gave a lecture, illustrated by lantern slides, on missionary work in Central Africa.

### THE PARLIAMENTARY SHOW

The fifth and last session of Alberta's seventh legislature prorogued last Wednesday and a general election announcement may be expected at any time.

For fifty-two days the members sat in session, facing an enormous grist of resolutions and bills that kept coming till the very last day when the House amended the Dalrymple's Act to increase cars carrying cream to creameries, prohibiting the carriage of cream in any but licensed cars.

The question of redistribution went the House on the last day. D. M. Duggan, Conservative leader, wanted the number of members in the next House cut from 63 down to 34. Mr. Shields, U.P.A. of McLeod, wanted it cut down to 20 members elected at large. Mr. W. R. Howson, Liberal leader met the situation with an amendment calling for "a substantial reduction" in the number of members. The Howson amendment came near passing, being defeated by a vote of 27 to 21.

Premier Reid led the attack against any reduction of the membership, and presented this: After a hot debate, the U. P. A. majority behind Premier Reid succeeded in defeating the resolutions and amendments offered by Messrs. Duggan, Shields and Howson. So the coming general election will be for the same number of seats with the same electoral boundaries as at the last general election.

The Shields resolution also asked for a special fall session to put through redistribution, members to receive a per diem allowance for the proposed fall session. The defeat of this resolution is taken to mean that the general election will not be deferred after late June or early July.

Most sensational of all legislation passed by the government in its dying days, were the two bills to muzzle the press of Alberta. Following a heated debate in which it was charged that the measures are aimed at preventing, during the election period, reports of the appeal proceedings in the McPherson divorce suit, and the Brownie seduction suit. Attorney General Lymburn compromised by amending the bills to exempt reports of all lawful progress at the time the bills were passed.

It was urged by W. R. Howson, K.C., Hugh Farthing, K.C., and other legal authorities that report of the McPherson decision in the McPherson suit is vital, as it will settle the question whether divorces can be granted in Alberta in suits tried during noon-hour recess in judges rooms, to which the public is refused access.

As the law at present stands the Appeal Court of Alberta holds that such a hearing is a public one. The new laws, more drastic than any in any part of the British Empire, impose penalties of \$5,000 on a paper, owner, editor, and writers who publish statements of claims in civil actions, or reports of injuctions obtained ex parte before a

Due to unfortunate circumstances, the hockey club winds up the season considerably in the "RED" and an endeavor will be made to balance the ledger in order to start with a clean sheet next fall. A dance will be held on May 6th, in the Gleichen Community Hall, for this purpose and since this is a public holiday, the King's 25 Year Jubilee it would be much appreciated if other organizations in the district would not sponsor anything on that day which might interfere with the success of this event.

Judge in chambers, or anything but a bare outline of the proceedings in civil actions and matrimonial suits. Newsdealers who handle papers which contain any prohibited matter are also liable to fines of \$1,000 each.

Before the Legislature went out of existence the U.P.A. voted down the resolution of liberal member Hugh J. Montgomery to sell the fleet of autos purchased for the use of the ministers. He said these were used for social and political purposes and it would be cheap and fair to follow the example of Ontario and Saskatchewan and allow ministers mileage at the same rate as civil servants for the use of their cars.

Following the prorogation of the Legislature, W. E. Howson, K.C., Liberal leader left for Calgary at attending a convention of Young Liberals of Alberta. He will make a tour of the southern nominating conventions and address meetings in the southern constituencies.

In the week of May 12th Mr. Howson will commence a tour of the northern constituencies. In the coming campaign the Liberals, it is said, will have a candidate in every constituency.

Many changes are inevitable in the next Legislature. Among those who failed to secure re-nomination are Speaker G. N. Johnston, U.P.A. member for Coronation, and Brodie Hennig, U.P.A. member for Clovers Bar. Fred J. White, labor leader of Clovers Bar, is not offering himself for re-election, but will run in the federal election for East Calgary.

Even if one could fool all the people all the time, it wouldn't be necessary, with so many willing to fool themselves.

## Your Boys

I have four sons, two of them approaching the age when they must go out and face the earning of a living, writes a man to a newspaper. He is distressed and troubled over the prospect of the difficulties which for this time being may confront them in obtaining employment and making a start in life? No, he is wise enough and has had experience enough to realize that countless thousands of other young men starting to leave our careers for themselves had to face difficulties and had many obstacles to overcome before they could find suitable work and start upon a career.

Nevertheless this father of four boys is worried. He has reason to be, and so, too, have other parents all over the land. This man writes that all this recent propaganda, these ever-repeated demands, that the Government should take responsibility for the home, the family, the school and the security of social insurance causes him to wonder if the prospect of so much sheltering, so much safeguarding, so much financial protection, so much paternalism will cause his boys to discount, disregard, despise his teachings.

Another man, he says, tried to impress upon them that they must fit themselves to make their way in the world, that they must develop self-reliance, that they must cultivate a spirit of manly independence, that they must be prepared to earn every penny coming to them, that they must exert nothing for nothing in this world.

Another man, he says, insisted that they must be studious and industrious, that they must exercise rational frugality and self-denial until they have accumulated a competency, that they must aspire now only to take care of themselves and their dependents, but to acquire means to aid generously those who are in need.

Another man, he says, advocated extravagance, ostentation, chaffiness, thoughtlessness, in order that they may escape the hardships and humiliations which beset so many in old age, explaining that it is infinitely better to be able to bestow charity than to be compelled to accept it.

"Don't be any professes, come your own," he said. "that the world owes you a living." One finds it hard to head that it is up to you to fit yourself to earn a living and that you will encounter plenty of competition. Don't hesitate to sacrifice in the fore part of your life if you hope to fare well in the later part of your life. Rainy days will come. Make diligent provision for them.

To tell the truth, that going forth in this spirit, eager to put more into the world than they hope to take out of it, and possessing unabashable faith in the eternal laws of justice and righteousness, they will find life joyous, they will accept difficulties as a challenge to their manhood, that, doing the right, they never be compelled to give way to despair, but will find their own life increasing happiness and content with the passing years.

Above all, that they must not be drones, loafers, leasurers; that they must exert themselves to the utmost to be useful; that through self-discipline and self-denial they may reasonably hope to earn the means to practice generosity and unselfishness.

Now, however, a man is depicted before them the prospect of an earthly Utopia, ruled by a Santa Claus Government, pictured as prepared to shoulder responsibilities which I was taught could be and must be discharged by each individual for himself, responsibilities which were portrayed not only as difficult, but as impossible to discharge by study and hard work development of the soul, development of strong character.

I am somewhat troubled lest my own young men and other young men may imbibe the notion that hereafter there is to be less need for supreme effort, less need for self-denial and self-discipline, less need for sacrificing to save, less necessity for self-reliance, less occasion to worry over finding work, less reason to be anxious, but, if instilled, less reason for systematically striving to provide for old age.

Perhaps this man is unduly concerned about the effect which all the loose talk of day-to-day about taking no thought of the future, that the Government will look after everything at all times and under all possible sets of circumstances, is having on the youth of the country. The anxieties and questionings will prove wholly unwarranted. Let it be hoped so for his sake, and the sake of his four boys and of all other young men who may be tempted to disregard the teachings, the lessons and experiences of past generations and, throwing self-reliance and self-effort to the winds, begin to live.

Nevertheless, all thoughtful and conscientious fathers and mothers must be perturbed as they witness the outpourings of dreamers and faddists preaching false doctrines and seeking to win the young people of to-day away from accepted and believed those canons of qualities which control the characters and lives of women and have had the deepest influence on the life and progress of the world, and lived useful lives. The worst enemies of youth are those self-appointed advocates and saviors who present to them as ideal a life of absolute contentment and leisure, free of personal responsibilities, free of worry, free of difficulties, with Governments playing the role of Santa Claus every week and month of the year.

## China Is Growing

The sold gold chain worn by the Lord Mayor of Dublin, worth \$50,000, has been handed down from official to official for the past 237 years without so much as a link being filled in transit. Indeed, it's the custom for the outgoing Lord Mayor to add a gold link to the chain as he passes it to his successor.

There are 14 breakfast food factories in Canada, of which 11 are in Ontario, two in British Columbia, and one in Manitoba. Canadian prepared breakfast foods have gained an international reputation, finding their way into almost every country of the world. The great amount, however, valued at \$2,500,000, goes to the United Kingdom.

## Improve Montreal Harbor

## May Move Passenger Section Five Miles Eastward

Plans for the complete rebuilding of Montreal harbor were outlined at a meeting of the Montreal harbor commissioners. The plans would allow quicker access from the St. Lawrence river, higher water, easier dredging in the softer bottom and elimination of the "St. Mary's current."

It was learned the harbor plan will in time move the whole passenger harbor about five miles eastward. The drawings show eight new piers, four of which will be long piers likely accommodating two ships, while in between them are four shorter piers. It is expected the new piers will accommodate about 40 vessels.

Decision to move the harbor further east, it was learned, came after a statement by Chief Harbor Engineer Paul Lecaille that dredging is a much easier task in the softer bottom further down the river.

Moving of the passenger section eastward, with softer bottom allowing easier dredging which would deepen the water, is expected to bring larger ocean-going ships to Montreal. In time it is hoped to have the channel deepened to 40 feet.

The St. Mary's Current, which makes shipping at times hazardous, is practically negligible further down the river, it was stated.

The new harbor development would cut down the time in the run from Quebec to Montreal by about an hour.

## SHE PLAYS ORGAN AT 75 YEARS

## Takes Kruschen To Keep Rheumatism Away

Writing to tell how she keeps her activity, this wonderful old woman states:

Hands were becoming so crippled that I had to give up piano and organ playing—and almost entirely gave up knitting. I have been using Kruschen Salts for nearly two years, and have very pleasant results. Last August I played two church services on the organ, and hope to do so again this August. My fingers are nearly straight, and quite painless. I am 75, and have recommended Kruschen Salts to many people. —A.A.C.

The six mineral salts of Kruschen have a direct effect on the body, neutralizing uric acid, which is the recognized cause of rheumatism. They also restore the eliminating organs to proper working order, and so prevent constipation, which often causes inflammation of the uric acid and other body poisons which undermine the health.

## Currency Stabilization

## Want Anglo-U.S. Conference To Settle The Question

Stabilization of world currencies was introduced into the budget debate in the British House of Commons by Sir Herbert Samuel, leader of the Liberal opposition, and other speakers.

"I wish the chancellor in his report had expressed a desire to secure a measure of stabilization of currencies and should have told us some form of a conference is contemplated with the United States upon which it may be much as upon ourselves and France, the decision rests," said Sir Herbert.

"Japan deprecates the yen, America the dollar, Belgium the belga, Britain the pound," said Sir Herbert, continued. "Depreciation is one of the prime reasons for the low level at which the state of the world continues.

"I regret the chancellor has made no survey of this important factor."

Furness Brathwaite, Conservative, echoed Sir Herbert's sentiments.

## Dominate Cotton Industry

## Japanese Wrestling The Industry From Chinese Territory

Japanese commercial expansion in North China has reached the point of almost complete domination of the cotton industry, most important enterprises in the area, with only one mill remaining wholly under Chinese ownership.

Threats of actual military penetration of this region, formerly the seat of the Chinese dynasty, have long since died down, but observers point out the Japanese conquest of the vast territory north of the Yellow river continues with Japanese capitalists, diplomats and business men taking up where the soldiers left off.

The first book of American cooking recipes has been attributed to Eliza Leslie, Bostonian, the date being 1830. 2696

## Real Market For Seeds

## Canada Imports Thousands Of Pounds From Many Countries

Since last July Canada has imported over 1,000,000 pounds of field crop seeds and 937,000 pounds of garden seeds not including flowers. Among the biggest importations are 464,000 pounds of alsike seed, 89,000 pounds of blue grass, 32,000 pounds of Chewing's rye, 465,000 pounds of red clover, 130,000 pounds of Red Top, 98,000 pounds of perennial ryegrass, 149,000 pounds of timothy seed, 47,000 pounds of white clover, 242,000 pounds of mangold seed, 57,000 pounds of rape, 722,000 pounds of sunflower seed, 125,000 pounds of turnip seeds.

In the garden seeds there were 83,000 pounds of beans, 64,000 pounds of beet seed, 70,000 pounds of carrot seed, 123,000 pounds of onions, 15,000 pounds of radish, 27,000 pounds of lettuce, 28,000 pounds of onion seed, 297,000 pounds of peas, \$1,000 pounds of radish, 51,000 pounds of spinach, 14,000 pounds of turnip seeds.

The sources of origin of these seeds is of interest; for instance the peas came chiefly from the United States and the British Isles, but there was also some from France, New Zealand, Holland and Japan. Over four hundred pounds came from Japan. The turnip seed came from the British Isles and the United States and also from Holland, Denmark, Japan and China.

The seed of kohlrabi was collected from the United States, Great Britain, Holland, Denmark and Italy.

The sugar beets came chiefly from Germany, but there were also sizeable amounts from Holland, Czechoslovakia, Poland, Britain, the United States and Denmark.

Spain enters into the picture in the onion seeds as well as the U.S.A., the British Isles, France, Holland, Italy, Japan and China.

The seed of kohlrabi was collected from the United States, Great Britain, Holland, Denmark and Italy.

## TO ALWAYS GET FAST PAIN RELIEF

An Aspirin tablet starts dissolving as soon as it touches moisture. That means that Aspirin starts "hurting" hole! It relieves even the most headache, neuralgic or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin doesn't harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all drugs have it.

### Demand and Get ASPIRIN

TRADEMARK REGISTERED IN CANADA

## Canadian Mining Goes North

### Important Ore Discoveries Made In Northern Areas

Along the Mackenzie River system in the areas adjacent to Great Bear Lake, Great Slave Lake, and Lake Athabasca an aggressive campaign of mineral development was carried out during 1934. One of the highlights of the year was the spectacular discovery of gold at the mouth of Yellowknife River, 70 miles southeast of Rae, on Great Slave Lake. Prospecting has been carried on intermittently in this area for several years and the find made last autumn has given a decided impetus to prospecting and exploratory work. Following the initial strike there has risen the price of silver, interest in mineral developments throughout the Mackenzie River region has greatly increased.

At Canada's radium-producing mines at Great Bear Lake, pitchblende and silver deposits were mined and developed continuously throughout the year. Last autumn 75 tons of high-grade pitchblende and silver concentrates were shipped to the refinery at Port Hope, Ontario, nearly 4,000 miles away. Due to the distance between the mine and the refinery, transportation presented a most complex problem, especially during the winter months, but arrangements have now been made to ship a limited tonnage of ore and concentrates by airplane during the winter months to assure continuous refinery operations.

Following the discovery of high grade pitchblende in a large quartz vein in the vicinity of Hotchkiss Lake, which lies 110 miles to the south on the air route between Great Bear and Great Slave Lakes, late in 1933, prospecting has been most active but to date no deposits of commercial

dimensions have been located. Apparently important gold discoveries were made on the north shore of Lake Athabasca during the summer of 1934, and the deposits are being explored by trenching and by diamond drilling.

### Following Up Old Legend

#### Explorers Will Search For Blond Sirens In Africa

Two French Alpinists started for the African desert recently on a scientific expedition which well-wishers regarded as worth while. It is a search for the blonde sirens of the Hoggar Mountains said to be so beautiful that no man who sees them ever returns.

Despite modern skepticism, the legend persists that on the Gara Ti Djamous peak in the Hoggar Mountains, stronghold of the blue-skinned Touaregs, the sirens live in gardens of Eden-like beauty. Natives, well satisfied with their lives on the level ground, refuse to approach the peak for fear they will see the sirens and fall victim to their wiles. They cite the cases of two natives who climbed the mountain and never returned.

Louis and Maurice Cottet, of the French Army, and Roger Frison, both members of the French Alpine Club, are the explorers. They started by automobile for Tamanrasset, to pick up natives and camels for a 745-mile trek across the desert to the mountains.

Couette said that in addition to looking for the sirens they would investigate the origin of the legends concerning them and seek ethnographic knowledge of the early tribes. If other excitement failed them, he said, they would hunt.

Only recently French officers and tourists approached to within 1,000 feet of the summit of the sirens' mountain and found evidence of life and remains of pottery. They had to make the climb without the aid of their natives, who fled as they reached the lower slopes.

### Precocyt Extract

#### Strategic Results Obtained From Use Of Compound Made From Thymus Glands Of Calves

Full verification of existence of a precocyt extract, one of the most unbelievable discoveries of science, was reported to the American Philosophical Society. The extract comes from the thymus glands of calves. It causes young rats to grow up physically and mentally, in half-normal time, shortening their adult lives which begin so much sooner.

The extract is ready to be tried out to learn what human uses it possesses. There is no expectation, said Leonard G. Rowntree, M.D., of Philadelphia, who reported it of life and death importance. The writer of the letter device have been making their appearance, and many improvements to the original design have been evolved.

Out of Sheffield there is now coming a safety razor that is perhaps the most revolutionizing to reach the market since the new shaving era set in. This razor was shown at the British Industries Fair this year, and operates upon a new principle.

The blade consists of a long strip of Sheffield steel, 57 inches in length, which is wound on two spools in typewriter ribbon fashion, so that when the length in use is dulled the spool may be wound and a fresh blade length made available. This blade, it is claimed, requires neither great strength, and the whole is only slightly heavier than the ordinary safety razor.

Only Sheffield steel—which means the best steel—is to be used in the manufacture of the new blade, even if patent rights are granted to foreign firms.

### Ship Construction

#### Figures Submitted By League Of Nations Show Increases

An increase of more than 1,000,000 tons in shipping under construction in Germany, more than doubling the amount, is a feature of the League of Nations' financial and economic review for the first quarter of 1935, compared with the same period of 1934.

In March of last year, the reich was building 327,000 tons. The number rose to 1,208,000 six months later, and to 1,948,000 tons in March of this year.

Great Britain's construction in the same period increased from 4,810,000 to 5,580,000 and increases were also shown by France, Denmark, Norway, Sweden and the Netherlands.

While Germany's increase was well over 100 per cent, the combined increase of world tonnage in construction was only 18 per cent.

Industrial production indices show increases for Canada, Chile, Denmark, Italy and Norway. France's indices are unchanged and the Netherlands are slightly lower.

Another encouraging sign is indicated in the value of world commerce during 1934, which is higher than the estimates published in the monthly bulletins.

Estimated for February of this year indicate that the gold value of world commerce will be subject to a normal seasonal decrease and will reach the lowest figure ever shown in these reports, about 31 per cent less than in 1929.

### Operates On New Principle

#### Safety Razor Works On Spools Like Typewriter Ribbon

Ever since the straight-edge razor was largely replaced in home use by the safety razor new types of the latter device have been making their appearance, and many improvements to the original design have been evolved.

Out of Sheffield there is now coming a safety razor that is perhaps the most revolutionizing to reach the market since the new shaving era set in. This razor was shown at the British Industries Fair this year, and operates upon a new principle.

The blade consists of a long strip of Sheffield steel, 57 inches in length, which is wound on two spools in typewriter ribbon fashion, so that when the length in use is dulled the spool may be wound and a fresh blade length made available. This blade, it is claimed, requires neither great strength, and the whole is only slightly heavier than the ordinary safety razor.

Only Sheffield steel—which means the best steel—is to be used in the manufacture of the new blade, even if patent rights are granted to foreign firms.

### Gets Coveted Medal

The U.S. war department has presented the coveted "Purple Heart" medal of honor to Johnny John, full-blood Creek Indian and world war veteran of Wetumka, Oklahoma. He was cited for bravery and severe wounds sustained in the Meuse-Argonne battle of 1918.

Milk baths are offered guests at hotels on the island of Oshima, near Japan, because milk is plentiful and water is scarce.

Hungary is such a self-sustaining country that salt is the only food product that it is obliged to import.

This second spot repeated everything the young born heavier, getting teeth their first day, opening their eyes the third day instead of the 16th, their fur grown, themselves weaned and self-supporting as rats in the third and fourth days of their lives.

### Mapping Canada

The vast scope of the work of mapping Canada—the third largest country in the world and comprising half a continent—is emphasized in the recently issued annual report of the Topographical and Air Survey Bureau of the Department of the Interior, which is the centralized air surveying unit of the Dominion Government.

This report points out that the undertaking necessitates utilizing all the resources of the science of surveying and fullest co-operation with provincial agencies engaged in work related to the task.

Inhabitants of England 2,000 years ago played dominoes, with carved bone pieces unearthed from excavation at Maiden Castle. But there was no double six.

The first cut in 400 years has just been made in the walls of Salisbury cathedral in England to make way for a new door in the north choir aisle.

For the first time in 2,000 years a double six.

Find Skeletons Of Human Beings  
Believed To Have Belonged To  
Medieval Times

Several skeletons of human bodies believed to have belonged to medieval times, have been found near Newbury, England. The bones were discovered two feet below the surface, and the positions show that the bodies were buried with their heads to the east. The spot is near a building known as "The Littleton," on the site of which at one time was the priory of St. Bartholomew, and attached to it was a chapel, part of which still stands.

Preferred Prison

Africans being sent to a Nazi concentration camp, Charles Klein, a Saarlander, aged 23, sought to be placed in a French prison by striking a captain violently in the face as the officer was examining refugees entering France from the Saar. Klein was arrested and lodged in prison at Saarbruecken.

Auntie knows the difference between cheap stuff and the fine mustard grown in the Fan District of England, with chaff and hulls eliminated, and ground D.S.F.—that means "double superfine." The only way to get the real mustard flavor and true economy is to insist

on Keen's Mustard, dear!

There's mustard in it, but for the most part it is flour and turmeric and mustard hulls and colouring matter."

## Stains flush off this easy way

Once each week sprinkle Gillett's Pure Lye—full strength—into the bowl. Off come all stains *without scrubbing!* Kills germs, banishes odors as it cleans. Free trap and drain pipe from obstructions. Absolutely harmless to plumbing and enamel. Get a tin today!

\* Never dissolve lye in hot water. The action of the lye itself heats the water.

## GILLETT'S LYME EATS DIRT

### Honors For Rudyard Kipling

#### Now Approaching His 60th Birthday, His Name May Appear In Jubilee List

To Rudyard Kipling, often referred to as "the forgotten man of English letters," may come at last some measure of official homage which his legion of admirers has thought long overdue.

Now approaching his 60th birthday, the writer is being mentioned as an almost certain recipient of laurels from the king's jubilee list.

Strong representations, it is understood, have been made in behalf of Kipling by Sir George Grey, president of the British Academy, who received the Nobel prize for poetry almost 30 years ago. Although his famous "Recessional" was chosen to be read at Queen Victoria's second jubilee in 1897, he has been given no official part in the program of celebrations this year of King George's 25 years on the throne.

SO WOULD I LIVE

The kitten frolicked on the floor, Where poplar shadows played, And stretched a silken paw to catch A leaf of shade.

He was a thing of matchless grace; Life's pulsing, vibrant toy, His every movement, every breath Was full of joy.

For him the now was all; he knew The moment, nothing more: All time to come meant naught, nor all Time gone before.

So would I live, so would I lose The thought of days to come, Or of days past. My universe A shadow true!

### London Being Transformed

#### Steam And White Paint Turning It Into Dream City

London is being quickly transformed with hot steam and white paint into a dream city. The paint manufacturers must be rubbing their hands and studying the lists of grosses moors. For the truth about white paint is put in a nutshell—one thing leads to another. A newly-painted house serves as a beacon to reveal the shame of a dingy neighbor. When father says "paint", we all paint. That, mercifully, is out of fashion in most London houses and terraces, which should be so in all. Imagine, if in Carlton Terrace—that dastardly proctectional drop-come—it was a case of please yourself! That stately and comely facade would then resemble a row of neglected teeth. When the Athenaeum has revealed once more its white, Italianate sides and shows its classic frieze picked out in ivory on a sky-blue background, then must the Travellers' and the Carlton look to their laurels and don their Jubilee finery, or else send their winter garments to the wash. Already on a sunny spring morning London is a beautiful sight and can challenge comparison (with reservations), with Florence.—The Sphere, London.

STRONG REPRESENTATION

They do not tell: Content with their allotted task They do but grow, they do not ask A richer lot, a higher sphere, But in their loveliness appear, And grow and smile, and their best, And unto God they leave the rest.

INTERPOSE NO BARRIER TO HIS HEALING POWER, working in you all the good pleasure of His will. Yield yourself up utterly to His sweet control. Put your growing into His hands as completely as you have put all your other affairs. Submit Him to manage it as He will. Do not concern yourself about it, nor even think of it. Trust Him absolutely and always. Accept each moment's dispensation as it comes to you from His dear hands as being the needed sunshine or dew for that moment's growth. Say a continual "yes" to your Father's will. Look at the flowers in the serene summer days, they quietly open their petals and the sun shines into them with its gentle influence. So will God do for if you yield yourself to Him.

WILL OFFICIALE AS WARDEN

JOHN BUCHAN TO PARTICIPATE AT CELEBRATIONS AT NELDPA TH CASTLE

John Buchan, Canada's next governor-general, has accepted an invitation to officiate as warden of Neldpath castle at celebrations at the historic stronghold next June. Neldpath castle is in the border fortress where Mary, Queen of Scots, spent the night of August 27, 1563. It is situated in the romantic district where Buchan drew his inspiration for his first book, "John Burnet of Barns." The functions in connection with the royal jubilee are due to June 19.

INTERNATIONAL BOUNDARY COMMISSION

One of the functions of the International Boundary Commission is to maintain the boundary between Canada and the United States as at present constituted in such a state of effective demarcation that at no point on the boundary need there be any doubt about its exact location.

## When Caesar was a boy

The Forum was the common market-place for all of ancient Rome. Today a few crumblin columns stand as mute reminders of its former grandeur.

In our present day complex civilization, market-places have become scattered. It is no longer possible to visit them all in a morning—or even in a day.

Advertising, instead, has become the convenient Forum of modern buyers and sellers. If you are considering the purchase of a new car, you scrutinize the automobile advertising. Or if it's a razor or a radio that you want, you turn again to the advertising. Here is the national market place of merchandise.

Furthermore, as you leaf over those same pages of products, your mind is storing away for tomorrow a compact and valuable fund of information. Instinctively, you will remember those facts when you make your future purchases.

Advertising has become the common market-place of this twentieth century

## Town & District

Wonder if there is any possibility of baseball here this summer? If there is no possibility of baseball how about softball to while away the summer evenings.

Mrs. J. Greer of Calgary spent a short time in town last week.

Some people want to know what is the matter with holding a school fair this year.

Mrs. Kathleen Bach has returned home from Mount Royal College in Calgary, where she has been for the past year.

The United Church Women's Association are holding a "Cafeteria Tea" at the Eventide home, Saturday May 11th. There will also be a sale of home cooking and plain sewing. All the family welcome. Watch posters for added attractions.

When you have a visitor or visiting somewhere yourself let us know about it. The Call is always glad to get these news items.

N. Riddell has opened a gas and oil station on the corner of Crawford St. and the Main Highway. This is the same place that Ted Krause operated last year.

Max Yates returned home Monday evening after spending the past year attending the University of Alberta in Edmonton. Max is studying medicine.

### CARD OF THANKS

Mr. and Mrs. Adam Kent and Mr. and Mrs. J. L. Mitcham wish to express their deep gratitude to their many friends of their dear sister, Miss Annie Kent, for great kindness shown during her recent illness and death.

### FACTS ABOUT CANCER

Cancer is curable when adequately treated in its early stages. Always fatal if left untreated. A disorderly growth of cells within the patient's body. A rapidly growing tissue serving no useful purpose in human economy. At first a local growth that spreads to other organs if not destroyed or removed. Often preceded in many cases as pre-carcinomatous stage, the so-called "polyp". Stimulated by prolonged irritation, the tissues in which it occurs. One of the oldest known diseases. Distributed throughout the animal kingdom. The second largest cause of death in the United States and Canada. Reducible 30 to 50 per cent as a cause of death if the public and physicians take advantage of known facts concerning its control. Treated successfully by one or more of the following: surgery, x-rays and radium.

Cancer is not an incurable disease in its early stages. Catching, or due to a germ. A blood disease. Caused by immoral or unclean practices. Directly transmitted from parent to offspring. Often accompanied by pain in its early stages (bone cancer except). Peculiar to any age, sex or race. Restricted in its growth. Primarily caused and cured by any known diet. Caused by using tobacco, alcoholism. Caused by electrical refrigeration. Primarily caused by constipation. Significantly affected by the use of alcohol. Significantly affected by mental worry. Cured by faith healing, seances or other medicines.

Send in your contributions to the cancer fund at once.

### A MORE BEAUTIFUL CANADA

Canada has been richly endowed with great natural beauty and, except where man in cities, towns, and villages has turned that blosominess into a semblance of garbage dump, the land is a vista of endless charm. Just as a man is oft-times judged by his clothes, so is a community appraised by its environment, and that environment is at once the responsibility of every member of the community, individually and collectively. The home after all is the starting point for the most effective re-beautification of the spots despoiled of their natural grace, and, where each home is beautified, the fulfillment of a comprehensive scheme of beautification on civic or community lines is made a comparatively easy matter.

This has been amply proved by the success of the More Beautiful Canada campaign sponsored by the Canadian National Council four years ago. The idea of beautifying the home surroundings had, in many places, only to be suggested to be acted upon, and now Canada possesses many more beautiful towns, villages and homes, some lowly but all the more lovely in their lowliness. The use of flowers and plants on the porches and walls of a home, in the gardens, and in adjacent spaces is not a matter of mere show. It goes deeper than that. In reality it

## COMING EVENTS

May 11—United Church W. A. Mother's Day Tea at the Eventide Home.

strikes at the roots of civilization.

It represents the supremacy of the higher over the lower forms of life. So much so, that if the world were one beautiful garden and every inhabitant interested in it, there would be no more war. Every human being is influenced to a greater extent by his surroundings than is generally realized. Where there is harmony—and harmony of flowers symbolizes the blending of the higher impulses—there can be no discord.

The story is the oldest one known. Adam was appointed to dress the garden of Eden and keep it (Gen. ii 15.) He did not do so and was sent out of the garden to till the ground. (Gen. iii 23.) Children reared to love flowers, and their hearts filled with love for beauty, and thus have less room in their hearts and minds for the things that hurt and destroy.

Still another point of view. The progressiveness and thrift of a community or municipality are often reflected in its appearance, and, while the Dominion is stressing the importance of the influx of tourists, the best advertising that any community can do is to present a pleasing appearance.
